Course Description:
The purpose of this course is to advance your clinical knowledge & implementation of the Interactive Metronome (IM) within the healthcare setting. You will learn how to effectively transition from working on basic timing in Phases 1-3 where you addressed fundamental cognitive & motor skills, to Phase 4 where your patient will learn to generalize timing skills to further improve cognitive, communicative, and motor skills. Discussion will include information specific to the practices of Speech-Language Pathology, Occupational Therapy, & Physical Therapy, including tips for grading therapy activities for success. This course is not offered for contact hours/CEUs.

Target Audience:
This course welcomes the following professionals who have completed the Interactive Metronome Certification Course.
- Speech and Language Pathologist
- Speech and Language Pathology Assistant
- Audiologist
- Occupational Therapist
- Occupational Therapy Assistant
- Physical Therapist
- Physical Therapy Assistant
- Athletic Trainer
- Licensed Medical, Rehabilitation or Mental Health Professional
- Music Therapist

Instructional Level:
Intermediate

Learning Outcomes:
Upon completion of this course, participants will be able to:
- Determine when your patient is ready to transition from working on basic timing skills in phases 1-3 of IM training to phase 4 where (s)he will learn to generalize timing to the rest of the body as a prerequisite for more advanced skill acquisition;
- Continually reassess your patient & select appropriate IM software settings to facilitate improved global timing & function;
- Introduce more advanced, skill-specific therapy tasks at the appropriate time in IM training in order to address specific cognitive, ADL, and/or motor skills.

*Note: This course covers information that pertains to licensed therapists and therapy assistants. OTA and PTA professionals must practice IM under the supervision of a licensed OT or PT.

Specific Learning Outcomes for Speech-Language Pathologists & Audiologists:
- Determine when your patient is ready to transition from working on basic timing skills in phases 1-3 of IM training to phase 4 where (s)he will learn to generalize timing to the rest of the body as a prerequisite for more advanced speech, language & cognitive-communicative skill acquisition;
- Continually reassess your patient & select appropriate IM software settings to facilitate improved global timing & function;
- Introduce more advanced, skill-specific therapy tasks at the appropriate time in IM training in order to address specific speech, language, and/or cognitive-communicative skills.

*Note: This course covers information that pertains to licensed therapists and therapy assistants. SLPA professionals must practice IM under the supervision of a licensed SLP.

Instructor:
Dara Coburn, MS, CCC-SLP received her undergraduate and masters degree from the University of Central Arkansas and holds the Certificate of Clinical Competence issued by the American Speech-Language-Hearing Association. Dara served as the National Program Champion for Interactive Metronome within the HealthSouth Corporation. She currently serves as Interactive Metronome’s Clinical Support contact person for Life Care Centers of America. Dara has been teaching IM Certification Courses since 2007 and has contributed to the development of the Adult Best Practice Certification Course.
Fall Prevention Protocol. With expertise and experience in the field of neurological disorders, Dara has been able to accept this new treatment tool and successfully integrate it into her practice by modifying it to individually meet her patient's needs.
